

- The reason why I picked Dr. Jon Patricios, is that he has a standing relationship with Gauteng Cricket and communicates well with the different parties at stake.
- Morningside Medi Clinic and Netcare Rosebank is close by and Dr. Patricios has a practice in both these hospitals.
- I also picked both these hospitals as they have very good diagnostic radiology departments.
- I have put down the names of three different physiotherapy practices – Cliffe Deacon, Craig Govender and Rosebank Rehab Centre. Between the three of these practices you will always have times available for the players. Also, I think the Rosebank Rehab Centre should only be used in case of emergencies...
- The coaching staff is shown last on this diagram, only for the reason that a player will always have to be cleared for returning to playing... BUT, there will always be discussions as to when players can return to some sorts of activity – constant communication will take care of this...
- The biokinetics department can be used for rehab, or only for testing. The tests should be seen as benchmarks and not as the complete and only test to clear players to return to participation.
